

vandal resistant 'name window' audio panels

audio door entry

audio door entry

✓ **We use BS316 marine grade stainless steel** because it is tougher and more resistant to corrosion than other grades of stainless steel. SRS is the only manufacturer to use this top grade for all stainless steel vandal resistant door entry panels.

✓ **We supply a BS316 stainless steel back box.** Yes even the back box is BS316 stainless steel. At SRS we don't believe that you should receive galvanised or zinc coated mild steel which will show signs of rust within months. Your panels are designed to last a lifetime.

✓ **Every nut, bolt and screw** in the panel is also stainless steel for maximum corrosion protection.

adding a prox. reader
Panels with suffix /08 have a 40mm square cut out and are suitable for fitting a proximity reader. Unless you specify differently, we will assume that you require our reader to be fitted and the panel will have fixings accordingly.
See page 19 for suitable stand alone readers and control equipment. In general you will require a KDC250P kit.

engraving
Don't forget to specify your engraving when you order your vandal resistant panel.

✓ **We protect the speaker unit with a purpose designed BS316 stainless steel baffle plate** against vandalism. Many panels use aluminium mesh (if anything) because it is cheaper.

name window panels

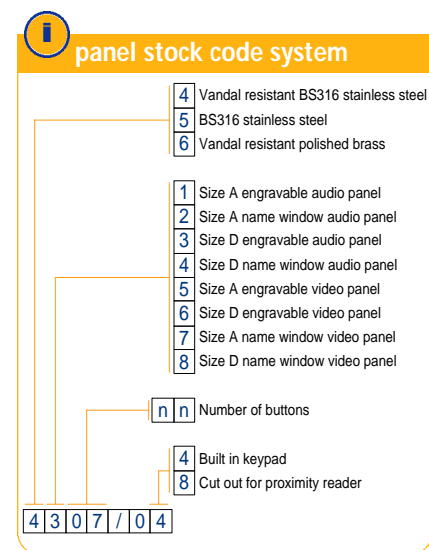

When you need your vandal resistant panels fast, choose from the name window panel range.
Pre engraved name plates allow us to deliver popular panels off the shelf for immediate installation.
The amplifier / speaker unit is included in the panel
